

# Angel Tablet Charger

Suitable for schools that use tablets for learning and instruction; the device ensures readiness for continuous tablet use; prevents harm from electric shock and provides convenient tablet storage after use. Angel Tablet Charger is a high quality product for charging up to sixty tablets at the same time. Ideal for schools and government or private agencies in general.

The microcontroller timer operates precisely without damaging batteries.

Power charging time is displayed in digital format.

Plugs meet standards for plug-in adapters.

The wheel locking system prevents the device from sliding and the wheels can rotate 360 degrees

The rust-proof stainless steel handle enables convenient transportation. Fans and vents are available in all directions.

## General Features

1. Able to store and charge Notebook
2. The device is made from 1.6 mm thick powder coated metal and resistant to impact.
3. The device can be disassembled to simplify transportation of the device in large quantities.
4. High quality 3-mm thick stainless steel handles for convenient transportation.
5. The device comes with lockable 360-degree rotating wheels capable of carrying more than twice the weight of the device.
6. Front and rear covers with locks are available.
7. Vents are located on the device walls to help release heat.
8. Equipped with a protection mechanism to prevent tablets from sliding out and impact absorbent material lining the inside of the device.
9. Equipped with a power cable storage space for convenient transportation or when the cable is not being used.
10. Electronic parts, including plugs and control boards. A plug-in terminal system is used which enables maintenance to be carried out by persons without a mechanical background. Teachers can initially solve basic problems on their own.
11. The operational control system is highly flexible and can be adjusted as needed.
12. The device is designed with primary focus on child safety and protection at potentially hazardous sites.
13. The manufacturing factory meets ISO 9001 standards.

# Angel Tablet Charger

1. Controls power charging with an accurate and precise micro controller system.
2. Display time in digital format. Power charging times can be set from 10 minutes to 24 hours at 10 minutes per step. The digital number display status while charging and when charging is complete.
3. Equipped with time compensation system for the event of a power failure. Once power returns, the charger will continue for the remaining time to prevent overcharging. Power charging will be restarts if normal timers are used.
4. Equipped with a system to reduce power surges in the initial stage of starting the charger which uses Zero Voltage Crossing Solid State Relay and start sets of ten to twenty chargers separately, depending upon the model.
5. Equipped with a system to control heat ventilation fans for continued operations after power charging is complete in order to ventilate accumulated heat.
6. The electronic control circuit board is coated with plastic coating to prevent corrosion by chemicals, humidity and fecal matter of animals, such as common house lizards, ants or other insects.
7. Equipped with an earth Leakage Circuit Breaker [ELCB] [option].
8. Equipped with a surge protection system [optional].

## Model Angel Tablet Charger

Model	Capacity	Dimension(WxHxD)	Tablet Dimension
T60	60BAY	800x865x600	
T45	45BAY	800x865x600	
T30	30BAY	500x865x560	
T20	20BAY	500x700x560	
T10	10BAY	500x525x560
